Ease-of-use

3 steps to get result. Fully automatic procedures, no need to add diluent.

Small Footprint

The device is designed in portable and space saving ways with dimension at 248*150*275mm, weight≤3.5Kg.

Microfluidic Technology

With preset freeze-drying reagent, the single-use reagent rotor applies advanced microfluidic technology to provide accurate results.

Multi-species

Supports cats, dogs, rabbits, mice, monkeys, cows, sheep, goats, horses, pigs, camels etc., up to 17 species.

Micro Sample Volume Required

Only 100 μ L (~2 drops) of whole blood, plasma or serum is needed to run a full comprehensive panel that includes electrolytes.

Minimal Maintenance

No wearing parts such as pumps, valves, etc. Use xenon light source for long service life.
